Education

Ege University, Computer Programming - Associate Degree

September 2018 - June 2020

Projects

Music Streaming Service

A basic spotify like service written in Javascript. This was my first project. It has client and api backend. I used Bootstrap, HTML, SASS, ExpressJS, NodeJS and Mongoose(MongoDB).

Arcus (WIP)

A native mod manager for Linux built with Electron. Although Arcus is far from done, learned a lot about advantages and disadvantages of Electron and further improved my skills in Javascript and programming in general.
